Important Child Safety Information

New mandatory standards were introduced at the end of February 2014 which affected the manufacturing and installation of all internal blinds in homes and public buildings.

Tragically, there have been a number of accidents where children have become entangled in window blind cords. Although thankfully rare, the EU has revised the standards governing window blinds to ensure child safety measures are always provided. NOVATEC and ECLECTICS fully support these changes to the EU standard. Our internal blinds

are fully compliant with the new standards for internal window blinds and we have a range of tested safety devices for making existing blinds safer.

We also have a range of "safe by design" blinds which have features especially tailored to make them perfectly safe for anywhere children live and play.

These include

- Ultimate Spring Roller Blinds see page 23
- Twin Pull Roller System see page 23
- Our Perfect Fit Roller see page 27
- Cordless Pleated Blinds see page 39
- Pleated Micro Blinds designed specifically for Bi-folding doors see page 45
- Ultimate Fit Pleated and Venetian blinds see page 48
- Wand Operated Flow Blinds see page 63
- Wand Operated Vertical Blind System see page 66
- Wand Operated Panel Blinds see page 75
- Motorised Window Blinds Systems.

Roller Blinds

Roller Blinds

General information

All prices are based upon overall blind sizes, not fabric sizes. If you require side fixing, please state this clearly on your order as it will affect the manufacturing allowance we make. Whilst every attempt is made to ensure that our fabrics match our collection books, dye batches will vary from time to time. Roller blinds ordered where the drop is 3 times greater than the width often will not roll up symmetrically. We therefore do not recommend roller blinds of such dimensions and we will not guarantee the product. We will however ask you to sign an order acknowledgement confirming your acceptance of this.

Digital printing

If you would like your image transferred on to a roller blind or sliding panel system our digital printing service could be the solution for you, we can take any image you own or have bought and print it onto a blind. All images should be a minimum of 300dpi (dots per inch) or larger. This should be emailed through as a JPEG file. Digital printing is charged for at price group 4 for standard finish and price group 5 for a blackout finish. Digital prints can be made up to a maximum of 2.3 metres wide by 3 metres drop, or if we turn the fabric, 3 metres wide by 2 metres drop.

Customer's own material roller and panel Blinds

We can take a variety of fabrics you send us and with our highly skilled laminating service and bond it to a high quality white or cream backing cloth. The backing gives the blind weight, body and room privacy. A blackout backing, which is ideal for bedrooms, is also available.

To calculate how much fabric to send us: if the blind uses only 1 width of fabric simply add 40cm to the drop of the blind; if the blind width is greater than a single width of fabric please allow a full pattern repeat as well as 40cm to the drop of the blind.

Good quality cotton, polyester or poly/cotton mixes are all suitable. Avoid velvets, acetate based fabrics and heavily embroidered fabrics. Where the blind required is wider than the fabric supplied we will join the fabric with a panel in the centre and a panel on either side to make up the blind width. Some silk and voile fabrics cannot be laminated and none can be joined, so the maximum width of the blind has to be less than the width of the fabric itself.

The maximum width of a laminated blind is normally 175cm, although wider blinds are sometimes possible (up to 300cm with a restricted drop.)

Roller Blind Specification

Standard Make Up

- Fabric comes off the back of the barrel.
- White chain (Novatec), Chrome chain (Eclectics).
- Chain located on the right hand side.
- Universal fixing brackets (top, face or side fix possible).
- Elegant white bracket covers.
- S1 bottom pocket.

Options Available

- Fabric can be reverse rolled (will come off the front of the barrel).
- Choice of bracket colours; Off White, Grey, Anthracite, Black, Bronze, Chrome, Stainless Steel, Natural Aluminium, Black Nickel, and Old Brass.
- Spring operation maximum size 2m x 2m.
- Chain located on left hand side.
- Choice of other shapes and finishes at extra cost. Except for S6 finish (metal bottom bar in silver, white, black or brown) this is standard on some fabrics.
- Sensors fascia system, either spring, chain or motorised operation.
- Perfect fit frame system.
- Cassette systems.
- Motorised operation with remote control systems.

Fabric Requirements Calculation Chart

To calculate the fabric requirement for your laminated blind, simply add the relevant values in the columns depending on whether your blind is straight or shape finished, joined or unjoined.

Example 1 - a straight finished one width blind of 140cm drop would require you to send 140cm (plus 40cm), i.e. a total of 180cm.

Example 2 - a straight finished blind, requiring a join, of 140cm drop would require you to send 2 x blind drop, i.e. 280cm plus 80cm plus 1 pattern repeat (if applicable), a total of 360cm plus pattern repeat.

	Straight Finish (S1, S6)	Straight Finish necessitating join	Shaped Finish (Scalloped/Turret & Pole)	Shaped Finish necessitating join
1 x Blind Drop	✓		✓	
2 x Blind Drop		✓		✓
Add 40cm	✓			
Add 70cm			✓	
Add 80cm		✓		
Add 140cm			✓	✓
Add Pattern Repeat (if applicable)	✓*	✓	✓*	✓
Total Fabric Requirement	Add above values	Add above values	Add above values	Add above values

*Please note if you require more than 1 blind and they need to pattern match, please add a pattern repeat to your requirements per blind.

Please ensure that all fabrics are supplied to us on cardboard tubes and that the cloth is carefully protected and not folded as any imperfections may delay the manufacture of the blind and impact on the finished product.

Small lateral pattern repeats, stripes and checked fabrics are not suitable for laminating and therefore will not be guaranteed.

Blinds made for motorisation

Whatever the look, size or material you like, there is a style of motorised blind to suit you and your home. Somfy® powered blinds can help control your home's lighting, temperature and privacy, as well as enhancing your comfort and security.

The benefits of electric blinds

- Comfort and privacy with the push of a button
- Completely child safe by design by eliminating cords and chains
- Motorisation makes your blinds look better for longer
- Set your blinds to a preferred position using the "my" button
- Somfy motors are compatible with leading Smart Home solutions
- Automate your blinds to make your home look occupied, even when you are away
- All our motors carry a 5-year warranty

somfy.®

Why should you consider battery powered motorised blinds?

No More Chains or pull cord hanging down. With just one click you can open or close your blind with perfect positioning and alignment. Somfy® motors are also ideal for large windows, high-up or hard to reach blinds. You can operate a single blind or group of blinds with one command, this can even be done on your smart phone remotely.

Battery power makes installation quick and easy without disruption to your home décor.

Solar Charging Pack - £78

This Solar charging panel will trickle charge your battery, reducing the need to plug in a charger.

The Range Explained

Roll-up 28 RTS Li-ion Embedded - £148

Battery powered, wire free motor which offers easy-to-fit motorisation for smaller roller blind applications, the battery is integrated into the motor making blind fitting easier. Can be used to operate blinds up to 3.5M² (fabric dependent).

Minimum width 638mm.

Torque 0.7 Nm.

The battery pack gives up to 12 months operation.

SONESSE 28 RTS Li-ion - £258

Battery powered, wire free motor which offers easy-to-fit motorisation for small and medium roller blind applications.

The battery is integrated into the motor making blind fitting easier. Can be used to operate blinds up to 9M² (fabric dependent)

Minimum width 607mm. Torque 1.1 Nm.

Powered with integrated Lithium rechargeable battery. A single charge gives up to 12 months operation.

SONESSE 30 WF RTS Li-ion - £335

A quiet wire free motor for medium sized blinds up to 18M² (fabric dependent). Minimum width 720mm.

Torque 3Nm. This motor is powered by an integrated lithium battery pack, for greater flexibility and ease of installation. It has a soft start and stop, and adjustable speed function.

Charging Extension Cable - £4

This is particularly useful on cassetted blinds

SONESSE 40 RTS - £412

This is an ultra-quiet, mains 230 volt motor which can be wired directly into a wiring loop or can be simply plugged straight into the mains. This is the quietest motor in the range and is also

the strongest and is the most suited motor for larger blinds up to 20M². Minimum width 581mm. Torque available in 3Nm, 6Nm or 9Nm.

Controlling Your Blinds

We offer a wide range of controls that work with all Somfy® powered motorised blinds. Whether you want a remote control, wall switch or you're looking for an automated solution, such as a timer or sensor, we've got the perfect solution for you.

Radio Control

Somfy RTS technology is safe, secure and reliable. With RTS radio technology there is no wiring between the motor and the control. Commands are sent via radio transmission, even through concrete walls.

Wall Mounted Switch Control

Battery powered wall mounted switches can be placed close to the blind. And with radio control, there's no wiring needed. No more searching for a remote down the back of the sofa.

Hand-held Remote Controls

Radio control is an ideal way to operate your blinds from anywhere in the home. Multi-channel controls can control numerous blinds at the same time with one handset.

Single and Multi-Channel Controls Explained

Single Channel Control

Suitable for all Somfy motorised blinds

Allows you to control the position of an individual blind. Or lets you control a group of blinds at the same time.

Multi-Channel Control

Allows you to control up to 16 different somfy motorised blinds.

Allows you to raise and lower individual blinds independently. Can also control blinds in zones or in groups.

Types of control

Smoove RTS Wall Switch Single - £70

Smoove RTS Wall Switch 4 Channel - £99

With a stylish single, or our new 4 channel Somfy® wall switch, you never have to worry about misplacing your controls again. The switch can be easily affixed with absolutely no disruption to your décor.

The WireFree™ Smoove Switch is powered by battery and includes options to raise and lower your blinds, along with a 'my' function so you can instantly recall your preferred blind position.

Handsets

We offer a variety of different handsets, from single channel remotes to the Telis 16, which allows you to control up to 16 different blinds individually or simultaneously from the LCD display. All Somfy® handsets are battery powered and feature the 'my' button, so you can set your blinds to the perfect position instantly. They also come with a mounting pin or bracket so you can affix them to your wall.

Situo RTS - £20

The stylish and robust Situo RTS remote control is a popular choice to control your motorised blinds on a single channel.

Situo RTS remote control to operate one blind or group of blinds.

Situo 5 RTS - £95

RTS remote control to manage from 1 up to 5 applications or 5 groups of applications.

Telis 1 Chronis RTS - £197

Single Channel Control and Programmable Timer.

The Telis 1 Chronis RTS® combines the functionality of a single channel RTS hand-held control with the convenience of a programmable timer.

Telis 6 Chronis RTS - £295

A centralised remote control to manage up to 6 blinds or groups with time programming. Manual / Automatic modes combined with centralisation and clock function.

Telis 16 RTS Control - £268

Manage up to 16 different channels with this centralised remote control. The LCD display lets you assign names and icons to each blind.

TaHoma® - £463

You and your smart home: always connected and in control with Somfy

With the new TaHoma® application, you can control your blinds with your PC, smart phone or tablet all remotely as long as you have an internet connection.

You will require a remote control in addition to set up the product.

You can set timers and programme scenarios.

Easy connectivity to compatible systems such as lighting, alarm systems, smoke detectors, heating, cameras and movement sensors.

Ta Homa provides a complete home control solution and is compatible with Alexa and Google Home.

With Ta Homa you can set up to 40 scenarios and operate on up to 50 separate channels.

Somfy Connexoon RTS - £208

Control your home with your smartphone, the only remote controller you always have at hand and that works anywhere, anytime.

With Connexoon you can control your blinds, using a very user-friendly app on your smartphone. With the intuitive "Check Home" function you can check and control connected devices wherever you are. The timer function allows automatic opening and closing of the blinds.

Connexoon enhances your home comfort and security.

Connexoon Window and Access are enabled to add lights, Somfy indoor RTS plug and Philips Hue. You can setup several "scenarios" for specific conditions. For example, let the roller blinds, curtains and roller shutters be activated by Connexoon when the temperature rises above 21 degrees making sure the home temperature stays comfortable.

Connexoon can be controlled through a free App:- **Connexoon Window RTS**

Control your blinds through your smartphone. Program weekly scenarios and simulate presence with the timer function so you can leave your home with peace of mind. Check your roller blinds and all other connected devices remotely with the check home function and adjust them from wherever you are.

Connexoon is the ideal and affordable answer for remote operation of blinds and curtains, from your smart phone, is Alexa compatible and can set up to 8 scenarios. it can operate up to 30 separate channels.

Motorised Curtain Tracks

GLYDEA ULTRA 60E

A quiet and smart motorised rail for all curtain types up to 60 kg weight. Mains powered.

A quiet and smart motorised track for all curtain types. High-end performance from the Glydea range.
Designed for ultra quiet operation.
Soft start and Soft stop.
Manual operation possible in case of power failure.
Touch Motion Open and close the curtain simply by pulling on the fabric.
Adjustable speed up to 20 cm/s.

Glydea 60 Ultra RTS £570
Glydea 60 Ultra WT £478
Glydea 60 Ultra DCT £478
DCT Cable £9

IRISMO™ 45 WIREFREE RTS

Discreet Wire Free Motorization for any style of curtains up to 45Kg.

Irismo™ 45 WireFree RTS is a battery operated, compact solution to easily motorise curtains.
Easy to install without disruption to your home décor.
Powered by a lithium rechargeable battery.
Touch motion - Open and close the curtain simply by pulling on the fabric.
Manual operation is also possible in case of a power failure.
Soft start and soft stop.
Adjustable speed up to 20cm/s.

Irismo Motor £540
Irismo Charger £93

300	153	154	156	157	159	160	161	164					

Roller blinds ordered where the drop is three times greater than the width often will not roll symmetrically. We therefore do not recommend roller blinds of such dimensions and we will not guarantee the product. When the blind is to fit inside the recess, a manufacturing reduction of 5mm will be made on the width of the blind. Some blinds over 220mm wide will require an S6 bottom bar for the smoothest finish (See page 28).

Wide Width Fabrics and Fire Retardant Contract Range

Unicolour

This is a range of 26 plain dyed Dim-Out colours with an F.R. finish.

The fabric is manufactured to environmental standard ISO 14001.

No substances harmful to the environment are added in the production of this fabric.

Flammability standard:- BS5867-2 2008 Part2 in accordance with BS EN ISO 15025: 2002 Procedure A

UV Block 95%-100% colour dependent see sample for further details.

300	179	181	185	188	191	318	321	324	327	329	332	335	338

These blinds are manufactured on a 40mm tube with white brackets and fittings and a sewn bottom pocket

Roller blinds ordered where the drop is three times greater than the width often will not roll symmetrically. We therefore do not recommend roller blinds of such dimensions and we will not guarantee the product. When the blind is to fit inside the recess, a manufacturing reduction of 5mm will be made on the width of the blind.

The Uniview series is designed to satisfy the highest technical and aesthetic standards as demanded by todays residential, comercial, educational and healthcare establishments.

Uniview fabrics are durable, washable and will not fray. Unishade fabrics meet BS 5867: 2008 Part2 Type B flammability standard.

Uniview is non toxic and is UV and bacteria resistant.

Uniview 3000 3% Openess UV Block 92%-95% colour dependent, see sample for further details.

Roller blinds ordered where the drop is three times greater than the width often will not roll symmetrically. We therefore do not recommend roller blinds of such dimensions and we will not guarantee the product. Depending on the fabric chosen some blinds may require joins, check the dimensions in the relevant fabric books. Laminated blinds over 175cm may not be possible, please check sizes with Sales office. When the blind is to fit inside the recess, a manufacturing reduction of 5mm will be made on the width of the blind.

Larger Blinds

For larger blinds, or blinds using heavier fabrics it may be necessary to use a larger diameter tube to avoid deflection on the blind and ensure smooth operation. The table below shows the various options available.

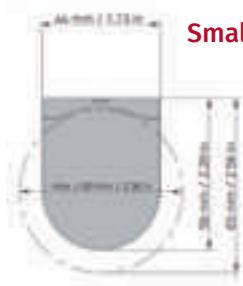

Supplementary cost for larger diameter tubes.

Width	200cm	220cm	240cm	260cm	280cm	300cm	320cm	340cm	360cm	380cm	400cm	420cm	440cm

Duo Fixings

Duo Brackets for two roller blinds fitted onto one bracket system - **£18**

A double bracket system which allows you to use two fabrics with one set of fixing brackets. For example a transparent blind to use during daytime and a blackout fabric to use for full privacy and room darkening.

- Combine different fabrics in one blind (eg. black-out and transparent)
- Compatible with chain spring or motor operation
- Elegant asymmetrical version with minimal light gap between fabric layers (Supplied with matching endcaps)
White, Off White, Grey, Anthracite, Black or Bronze
- Symmetrical version for larger blinds and installation in the recess (Supplied without endcaps)

Want to go chain free?

Twin Pull System add £24 to blind price

All the benefits of the chain mechanism

Child safe by design

The only non-motorised child safe by design solution for Horizon blinds and installations at height

Available in 6 colours (white, off white, grey, anthracite, black and bronze.) Can be used with Duo Brackets.

Ultimate Spring System

The latest spring technology which is completely child safe and gives the ability to adjust the blind speed and stop positions with a simple thumb wheel.

Minimum width 695mm Maximum width 2200mm

This spring is compatible with all of our cassette systems.

Available in 12 colours (white, off white, grey, anthracite, black, bronze, chrome, natural aluminium, stainless steel, black nikel old brass). Can be used with Duo Brackets.

Installation Profile

We now have available an installation profile available in choice of six colours, which enables you to attach your roller blinds at the window without having to screw the brackets in place at each end of the recess.

The blind brackets are integrated into the profile which allows you to attach the blind at any point across the width the profile using the top/face fix brackets provided.

The profile is available in two sizes to accept either a 28mm bracket or a 38mm bracket set.

The Installation profile can be used in conjunction with the Ultimate spring or Twin pull as well as standard chain.

Available in White, Off White, Aluminium, Anthracite, Black, Bronze

Semi Open Cassette System

This system is available in a wide choice of colours, White, Off White, Aluminium, Anthracite, Black, Bronze, or fabric covered. The cassette is offered in two sizes, the large version will accommodate wider blinds and longer drops comfortably. The cassette has a rounded, soft appearance and encloses the roller tube together with the end sets and brackets. The cassette can be top or face fixed, and is available as a motorised option. In addition, we offer matching bottom bars in the same colour range. Cassetted blinds cannot be reverse rolled.

Available in  **White**,  **Off White**,  **Aluminium**,  **Anthracite**,  **Black**,  **Bronze**

Small Semi-Open Cassette System

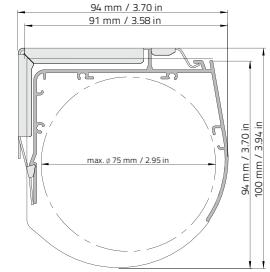

Width	60cm	80cm	100cm	120cm	140cm	160cm	180cm	200cm
	23½"	31½"	39¾"	47¼"	55"	63"	70⅞"	78½"
	37	45	52	61	70	76	83	89

Large Semi-Open Cassette System

Width	60cm	80cm	100cm	120cm	140cm	160cm	180cm	200cm	220cm	240cm	260cm	280cm	300cm
	23½"	31½"	39¾"	47¼"	55"	63"	70⅞"	78½"	86½"	94½"	104¼"	110¼"	118"
	56	66	77	92	102	112	113	128	136	155	165	175	190

This larger version of the cassette is ideal for wider blinds and heavier fabrics with long drops as it will have a larger carrying capacity.

Closed Cassette System

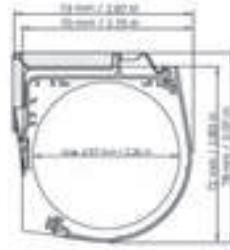

This cassette is available in two colours, White and Aluminium, but can also be fabric covered to match or contrast with the blind fabric. This cassette is also available in two sizes and the larger size will accommodate wider blinds and longer drops comfortably. This cassette can be fitted with side guides making it a perfect choice with blackout fabrics for a seamless finish.

As with all our cassette options this can be motorised and has a matching bottom bar available. If using a rechargeable battery motor an extention charging cable is recommended (See page 7).

Available in  **White**,  **Aluminium**, or fabric covered.

Senses Fascia System

N V Blinds are pleased to offer a high quality fascia system made from extruded Aluminium. This fully integrated system is available in white, cream, silver, anthracite or fabric covered, the pelmet has a rounded, soft appearance.

The system has three operating options, a standard chain operation, a 'Slow-Rise' spring option which also has an integrated height adjuster, so the blind can be stopped at the same position each time, and a motorised option.

Available in White, Cream, Anthracite, Natural Aluminium, or Fabric Covered.

Roller blinds ordered where the drop is three times greater than the width often will not roll symmetrically. We therefore do not recommend roller blinds of such dimensions and we will not guarantee the product. Depending on the fabric chosen some blinds may require joins, check the dimensions in the relevant fabric books. Laminated blinds over 175cm may not be possible, please check sizes with Sales office. When the blind is to fit inside the recess, a manufacturing reduction of 5mm will be made on the width of the blind.

Perfect Fit

Perfect Fit is a revolutionary stylish and versatile system of window blind, designed specifically for the modern UPVC window. As the name implies Perfect Fit enables tensioned roller blinds to be installed perfectly onto modern UPVC windows, including tilt & turn windows. The result is a simply stunning blind that will enhance the aesthetics of any room.

The blind is fitted within an all-round frame which is then fitted to the glass bead without the need for drilling any holes into the window frame. No holes need to be drilled, which means the blind can be removed at any time leaving the window in original condition.

Perfect Fit Frame add the following supplements to the standard blind price

Min width 380mm, Min drop 330mm
Max drop with blackout fabric 1300mm
Max drop with plain fabric 1700mm
Max drop sheer fabric 2000mm

Width	50cm	80cm	100cm	120cm	140cm	Drop
Drop	19½"	31½"	39¾"	47¼"	55"	Width
50	71	78	82	88	94	19½"
80	75	81	87	93	98	31½"
100	78	86	92	97	101	39¾"
120	80	88	94	99	103	47¼"
140	82	92	97	101	106	55"
160	86	96	100	104	109	63"
180	89	98	102	107	112	70¾"
200	93	100	104	109	114	78½"

Perfect Fit Frame is manufactured from white, cream, or anthracite powder coated anodised aluminium with pre-formed corners and locating holes are punched on the inside flange of the frame to allow the frame to be attached to the installation brackets. The position of the brackets is achieved by holding a credit card in each corner of the window frame and then sliding the installation brackets between the glass and the glass rubber. The Perfect Fit frame is then fitted onto the installation brackets by the locating holes in the frame. Please use the pricing table below along with the standard blind price from the relevant pricing table. Perfect Fit can only be used with standard stiffened fabrics.

Perfect Fit

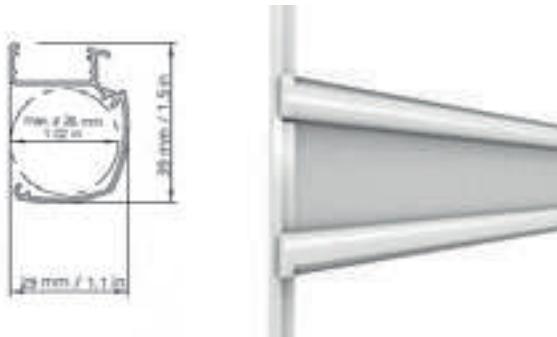

Micro Roller System.

The new Micro Roller system is an ingenious system that fits directly to the glazing using a powerful double sided adhesive tape. This system has two roller systems contained within small cassettes which are available in White or Silver.

Compact design for small-size windows approx 1200 x 1500 max depending upon fabric thickness.

This system can only be used with stiffened roller blind fabrics not screen fabrics or laminated fabrics.

Micro Roller blinds are easy to order please just give the visible glass size.

Roller Blinds for Sloping Roof Windows

Available in any of our stiffened roller blind fabrics. Before ordering please identify your window from the plate attached to it (the complete Alpha numeric code is required) and select your fabric from the fabric book. These are spring operated roller blinds, supplied made to measure, part assembled, ready for easy fixing to the window. Our sloping window blind system is guided and has silver aluminium side and pelmet profiles for more dim out effect and a brushed strip on the bottom bar. Laminated blinds cannot be used with sloping window roof blinds. We may be able to supply sloping roof systems for Rooflite and Keylite sloping windows. Please contact our customer service department for more information.

Bottom Up Blinds

For privacy at the lower part of the window, bottom-up blinds provide the solution. Available in all stiffened roller blind fabrics, excluding laminated fabrics. Blinds may be raised to any position from the bottom of the window to the top. Our closed cassette is used on this system, which is available in white or silver/anodised aluminium, it fixes onto the window sill, or onto the wall outside the recess. Brushes in the headbox prevent dust entering and the cords operating the blind tie off to a cleat. Universal wall or ceiling diverters are supplied, and the blinds are relatively easy to fit.

An S1 finish (sewn pocket) is fitted as standard, but an S6 (rounded aluminium bar) is also available and is standard for all blinds more than 170cm wide.

Bottom Up Blinds add the following supplements to the standard blind price

Width	60cm	80cm	100cm	120cm	140cm	160cm	180cm	200cm

Marble Fossil

A highly polished resin pull with green and brown tones with an impression of a fossil.

Marble Chalk

A highly polished resin pull in white with a marble effect.

Marble Flint

A highly polished resin pull grey and black tones.

Marble Sand

A highly polished resin pull with cream and caramel tones.

Marble Amethyst

A highly polished resin pull with purple and lilac tones.

Zulu

A smoked resin square with a dark brown mottle effect.

Bubble Pull

A clear resin cylinder with bubbles.

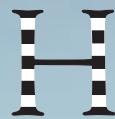

Liquorice Pull

A matt black and white cylinder pull.

Fusion Collection

Horizon Blind Collection

Perfect Light Control

Horizon is an elegant window blind treatment which utilises two layers of alternating translucent and opaque horizontal striped fabric. The front fabric layer moves independently of the back layer allowing the stripes of solid and opaque fabric to alternate between an open and closed position. The solid stripes control the amount of light being allowed to enter the room. With this blind, which has been described as a cross between a Venetian blind and a Roller blind, you can achieve full privacy, or simply diffuse and control the amount of light entering through the window; it is more flexible than a standard Roller blind and has a softer look than a Venetian blind.

Operating Control

The **chain** control will raise and lower the blind as well as filter the amount of privacy being created. The new **Twin Pull** is child safe by design and offers intuitive control. The blind can also be **motorised** for remote operation at the touch of a button – this is the ultimate in convenience and child safety.

Motorised Operation

This blind can be motorised using our range of Somfy motors (see page 6 for full details). The additional cost for a wire free battery-operated system starts at just **£148** and a hard wired system **£412** in addition to the standard price of a Horizon blind.

Safety

As always, our blinds are created with child safety in mind, and the Horizon collection is no exception. Every blind will be fitted with a chain tension device, and you can choose a motorised operation to do away with the operating chain altogether.

Stylish

In the fully raised position your blind is concealed neatly under a cassette, adding style to your window treatment. The cassette and other components are available in 6 colours (shown below), so it is easy to find an option to match or contrast with your home decor.

All blinds over 2000mm wide will require a heavy duty bottom bar.
All size blinds in design Mull will require a heavy duty bottom bar.

- White
- Off White
- Anodised Aluminium
- Anthracite
- Black
- Bronze

Fabric Selection

The range consists of 8 exciting fabric qualities, with a choice of 39 contemporary colours. Added to this we have launched 3 new Eclectics Horizon designs Tiree, Seaforth and Staffa. Depending on the fabric chosen the maximum blind size possible is 2550mm wide by 2500mm drop.

When a blind is to fit inside a recess a manufacturing reduction of 5mm will be made to the width.

Honeycell Blind Collection

The Novatec Honeycell Pleated Blind is available in both blackout and translucent fabric options, offering you the choice of light filtering or total privacy. The system is very neat, and blinds can be supplied as free hanging, tensioned, bottom-up/ top-down and motorised. The blind system incorporates a unique headrail which allows cordless child safe operation. The blind will have a minimal gap on each side of only 3mm, so this style of blind gives excellent coverage at the window.

Min/Max Widths & Drops

Standard	System	Min Width (mm)	Max Width (mm)	Max Drop (mm)
	Cordless	380	2500	2500
	Chain	360	3000	2700
	Motorised	600	3000	2700

TDBU	System	Min Width (mm)	Max Width (mm)	Max Drop (mm)
	Tensioned	300	1500	2400*
	Cordless	570	2500	2500
	Chain	610	3000	2700
	Motorised	840	3000	2700

* depends on width as per current pricelist tables.

There is an impressive choice of control options to choose from,

- Hand held remote control, with a single channel £25.
- 5 channel remote £36.
- 15 channel remote £61.
- 4 channel w all switch £152.
- Wi-Fi Hub for pull motion £324.
- The Motion App on your smart phone, which can be used to set scenes and timers and allows you to control blinds remotely giving the impression the home is occupied.
- Or override the remote control and Motion App with a simple pull chain on the blind.

When a blind is to fit inside a recess a manufacturing reduction of 5mm will be made to the width.

Pleated Micro Blind 16mm

The Pleated Micro is a slim line (16mm) pleated blind system that has been developed to allow it to be installed into a wider variety of compact spaces and bi-folding doors. This versatile design is suitable for a variety of bead types and depths. Easy to install and remove - with both screw and bead fit fitting methods available.

On the bead fit blinds, we have developed a new guided blind option. Guided endcaps restrain the bottom bar and prevent unwanted movement – this is a beneficial feature when installing on bi-folding doors.

The components of the Micro Blind are available in 3 colours - white, anthracite and brown to match both PVC, aluminium and wooden frames. Colour matching components result in a premium looking finish.

- Fully tensioned child safe design
- Designed specifically for bi-folding doors and compact spaces
- Guided operation available
- Bead fitting method - no holes, no screws... just style
- Unique system
- Shallow recess fit to protect glass and door
- Easy to install and remove
- Easily adjusted tension
- Fabric sits clear of glass
- Choice of rail colours that offer high end aesthetic to complement bi-folding doors
- Suitable for universal bead types - Square and angled

System specification

Tensioned bead fix Blinds

Max Width 1000mm Min Width 250mm

Max Drop 2400mm Min Drop 250mm

Max Area 2m²

Blind Width = Measured Glass Size

Blind Drop = Measured Glass Size

Fabric Size = Blind Width - 7mm

Blind Width < 590mm End spacing of 70mm 2 cords

Blind Width > 591mm End spacing of 70mm 4 cords

Tensioned Screw fix Blinds

Max Width 1400mm Min Width 250mm

Max Drop 2400mm Min Drop 250mm

Max Area 2.5m²

Minimum Bead Depth 16mm

Survey Instructions

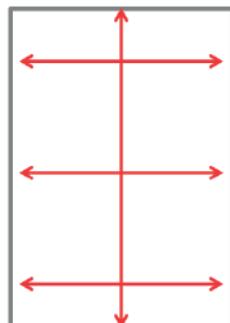

Measurements:

Note: Measure the glass size only.

- Measure the visible glass width at 3 different points as shown.

Use the smallest measurement as the blind width.

- Measure the drop. (ensure sizes are within specification as per table below)

- Check the frame & rubber seal type (See diagram below).

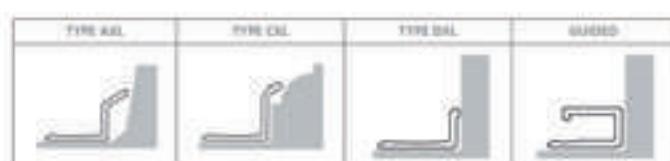

Square Frame with flush rubber seal?
Yes or No?

- Using the survey kit, select side profile that best fits the frame. Ensure that back face of side profile sits flat against the glass

Ultimate Fit

Ultimate Fit Blinds

This range of pleated and Venetian blinds have been designed to give you the Ultimate fit when used on UPVC windows and doors.

The very simple but ingenious head and bottom rails are fitted with small wedges which slide behind the rubber seal of a UPVC window and provides you with an easy to operate completely child safe no fuss blind, with minimal light gaps at the sides

See our website for measuring and fitting video.

Vista

CONTROL THE LIGHT

From Soft Subtle shading to complete Privacy

Beautiful

The beautiful and practical VISTA blind brings a feeling of warmth and security into your home through its soft design and unique operation.

VISTA is made up of two layers of soft fabric connected by horizontal sheer vanes that gently filter sunlight whilst maintaining different levels of privacy and UV protection as the blind is raised and lowered.

VISTA can also be motorised for your convenience with Somfy battery operated motors, enabling you to adjust your blind at the touch of a button from the comfort of your sofa.

See page 6+7 for full details of motorisation options.

Stylish

In the fully raised position your blind is concealed neatly under a cassette, adding style to your window treatment. The cassette and other components are available in 6 colours (shown below), so it is easy to find an option to match or contrast with your home decor.

- White
- Off White
- Anodised Aluminium
- Anthracite
- Black
- Bronze

When a blind is to fit inside a recess a manufacturing reduction of 5mm will be made to the width.

Express Wood Collection

Standard Specification.

- All Express Wood Blinds and Faux Wood Blinds are supplied with a matching valance as standard.
- The headrail and bottom rail are colour co-ordinated.
- Colour co-ordinated ladder and control cords.
- Valance width will be 12mm wider than the blind without returns and 14mm wider than the blind when supplied with returns.
- Raise control is positioned on the right-hand side.
- Tilt control cord is positioned on the left-hand side.
- Box end brackets and centre support brackets are supplied.
- Breakaway cord condensers and two-piece cleat are supplied as standard.
- Minimum control cord length is 250mm.
- Deduction from floor when installation height given is 1675mm.
- Minimum installation height 1925mm.

Specification Options.

- Choice of Tape colours.
- No valance, plain valance with one return, plain valance with two returns, oversize valance.
- Raise control, Wood on the left-hand side, Faux wood on the right hand side.
- Tilt control Wood on the right-hand side, Faux wood on the left hand side.
- Extension brackets or universal swivel brackets upon request.

Additional Information.

- Minimum width 290mm maximum width 2400mm.
- Minimum drop 150mm maximum drop 3000mm.
- Blind manufacturing operating tolerance of +/-3mm (width) and +/-5mm (drop).
- 19mm tape available for 25mm slats and 25mm tapes available for 35mm slats. 25mm/38mm herringbone tapes available for 50mm slats. 38mm Flatweave tape available for 50mm slat.
- Number of cords and ladders on each blind is dependent upon width.
- Co-ordinating tassel is standard when choosing contour valance/ silver contour valance.
- Stained ends available at additional 5% charge.
- Glued valance returns available at extra cost of £17.
- As wood is a natural product some variations in shade and graining is normal and enhances the natural appearance of the product.
- The operating control has a finished length 2/3rd of the drop of the blind unless restricted by child safety legislation.

Express Wood Motorisation Options.

- Wood Blinds are motorised using the Somfy Tilt and Lift 25RTS motor.
- Motorisation is not available when using tapes.
- Available on 50mm slats only.
- Minimum width available is 540mm.
- Maximum sizes are width and drop dependent.
- Maximum width is 1800mm (with a maximum 1200mm drop).
- Maximum drop is 2000mm (with a maximum width of 1200mm).

Option 1. Motor with rechargeable battery pack including remote £309

Option 2. Motor with mains pack including remote control £309

Extension Brackets / Universal Swivel Brackets

Cylinder
10

Bracket quantity dependent on blind width.

When a blind is to fit inside a recess a manufacturing reduction of 12mm will be made to the width of the blind.

Wooden Venetian Blinds

Arboretum Collection of Wooden Venetian Blinds

General Information

Choice and versatility

We now have an enhanced selection of woods and finishes within our new Arboretum Collection.

Bamboo

Our selection of stained Bamboo colours have very natural appeal. As the bamboo slats are relatively light in weight, it is ideally suitable for larger windows. Available in 35 and 50mm slats only.

Basswood

Basswood is a hardwood ideal for making into Venetian blinds, this collection of stained and painted wood colours with their subtle grain which remains visible after the wood has been lacquered.

Available in 25, 50 and 65mm.

Rustica

This selection is made with a Abachi wood which is a very light but strong species and offers a textured and rustic appearance, in a range of on trend colours.

Prices

Each sample in the selector has a corresponding price group below it. Blinds are supplied with universal wall/ceiling fix brackets and there are no extras to pay. No two trees are ever the same so slight variations in grain patterns, colour knots and warping may occur, adding to the natural appeal of wooden blinds.

Motorisation

50mm and 65mm blinds can be supplied with a mains system Somfy J4 RTS motor, at a cost of £562. up to a maximum of 8.8 M2. This motor will tilt and lift the blinds. a choice of remote control operations are shown on page 7 of the price list.

Colonial

A colonial finish adds tapes to the blind for extra privacy, light blocking and an enhanced appearance.

25mm wide tape is used on 25mm and 35mm slats and 38mm tape on 50mm and 65mm slats.

Add 5% to the cost of a classic finish for all tape options. Outside recess blinds are supplied with a matching mitred valance adding 35mm to the overall size.

Classic

Traditional dual operation with coordinating cords and Valance. Outside recess blinds are supplied with a mitered valance adding 35mm to the overall size.

When a blind is to fit inside the recess a manufacturing reduction of 10mm will be made on the width of the blind. For Colonial system(tapes) add 5%.

FLOW

Flow Blinds

General Information

Is it a blind, or is it a curtain?

Flow is in fact, a blind that looks like a curtain, but with far more flexibility. It is like having two pairs of curtains at the window!

Flow's unique weave offers the ultimate in shading and privacy, together with clean, contemporary lines and stunning fabrics.

By cleverly combining the delicacy of a voile fabric with the versatility of a rotating louvre, Flow looks sensational and provides several light and privacy options.

Flow fabrics are essentially individual curved vanes that are sheer in the centre with two solid panels to the outside. When your Flow blinds are open the sheer fabric filters the light and you can tilt the flow panels to close for complete privacy.

These blinds are perfect for large windows and patio doors:

- Soft flowing vanes filter daylight and retain the view when open
- Enjoy privacy and security when the blinds are closed
- Designed to be child safe. We recommend wand operation for convenience and safety

Vertical Louvre Blinds

Vertical Louvre Blinds

Price Groups

The relevant price group for each louvre colour/type is clearly marked on the label on the back of the fabric in the sample presenter. For sizes between those shown, please apply the nearest upwards. It may be possible to supply blinds which are larger than those shown – please enquire, or alternatively use two blinds. The head rail is supplied in white as standard, also available in silver as a free of charge option.

The blind is supplied with ceiling fix brackets as standard, wall fix brackets are available if requested at no extra cost. The control will be supplied on the

right hand operation unless otherwise requested. Bottom link cords and weights are included. For mixed colour louvres on the same blind, colours from the same price group incur no price increase; for colours from different price groups, apply the price for the higher price group.

For fabric details see presenter. For pair stack minimum width is 80cm. Larger blinds may be available on request. The standard control system on these blinds is a draw wand but dual cord controls are also available.

Roman Blinds

Roman Blinds

General Information

Our Roman Blinds come as standard with a premium chain operated headrail, using this system ensures the blind stays level at all times and is easier to lift and lower it also means you can halt the blind at any position, the fabric attaches to the head rail by Velcro. The headrail will be supplied as standard with right hand controls unless otherwise requested. Our lined roman blinds have hand sewn tops and bottoms and are tack stitched from front to back along the fold to ensure that no stitching is visible on the front of the blind. This creates a truly hand sewn look. Blinds will be lined as standard in either cream or white, please specify if you have a preference. If you prefer unlined, please specify. Blackout lining is available as an optional extra. All fabrics over 137mm may require joins. As standard the blind will be flat when fully down, extra folds are available on request – please call for details.

Lined/ Unlined

You can choose to have your blind lined or unlined. For the unlined blinds, deduct £20 from the relevant price below, with the exception of the following fabrics for which lining is not recommended and come unlined as standard: Voyager.

Please note if silks are ordered as unlined blinds they may be liable to light fading more readily than if ordered as lined.

Interlining

For a more luxurious feel, interlining is available at an additional 15% on the basic price of the blind.

Blackout Lining

Ideal for bedrooms, a blackout lining is available at a £27 supplement on the prices below.

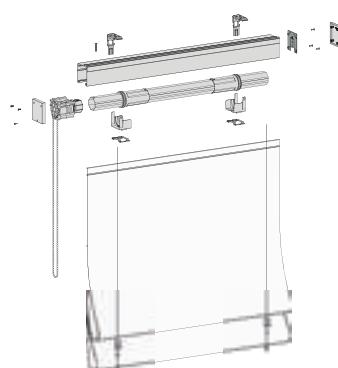

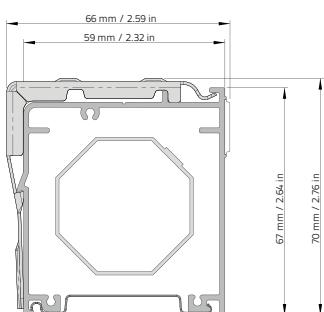

Motorised Roman Blinds

Our standard head rail system is available with a 12v DC motor that is situated within the head rail and can be fitted to either the left or the right-hand side. This system is powered by a battery pack which can be located to the rear of the blind and is supplied with a single channel radio remote control as standard. Please add £322 to the standard price of a Roman blind. This motor can lift blinds with a weight of up to 4KG.

XL Roman Headrail system

Now available to give you smooth lifting on larger and heavier roman blinds.

This system comes with chain operation as standard but may also be fitted with either a Sonesse 30 RTS with an embedded lithium battery, or the hard wired Sonesse 40 RTS motor. The XL head rail can lift blinds, which weigh up to 22KG.

Operation	Max. height blind		Max. width blind		Max. weight blind	
	m	in	m	in	kg	lb
Mono control (chain)	5.5	216.5	5.8	228.3	12.0	26.5
Motorized	5.5	216.5	5.8	228.3	22.0	48.5

XL Roman Headrail system available as headrail only or add the following supplements to the standard blind price

Width	100cm 39⅞"	150cm 59"	200cm 78½"	250cm 98½"	300cm 118"	350cm 137⅞"	400cm 157½"	450cm 177¼"	500cm 196⅜"	550cm 216½"	580cm 228⅓"	Width
	165	199	232	266	343	376	443	476	510	564	590	

Fabric Requirements for COM Roman Blinds

To calculate how much fabric to send us, please add 40cm to the width of the blind and the drop to allow for hems. If your blind is wider than the fabric itself then allow two lengths and any pattern repeats to accommodate joins.

Panel Blinds

Panel Blinds

General Information

Sliding panels are supplied made-to-measure to your exact requirements. All you need to do is supply the overall dimensions and whether you want pair stack or single stack (specify left or right). Since the panels are not a standard size the overlap will vary or occasionally we shall make the panels slightly larger or smaller. Leave it all to us – the effect will be stunning. We strongly recommend for practical and aesthetic purposes that you fix the system to the ceiling but we can supply wall fix brackets as an extra. If fitting into a window, try to allow space at the side of the window for all the panels to stack clear when they are open. A draw rod is supplied for each stack; in white as standard, a stainless steel rod is also available also cord operation is available at no extra charge. Please note panels over maximum drop restrictions may have issues with the length of the draw rods. Remember that maximum widths are different for pair stack or single stacks. For longer drops and wider systems than those shown please consult our customer service department.

Our ingenious system incorporates special Velcro carriers that pick up each panel in turn as they are drawn. The sleek design of the panel track means that no fabric is lost underneath the metal head rail. We also offer a non sewn option which is a

decorative metal carrier and bottom bar in white or silver. This option is available free of charge.

Digital Printing

If you would like your image transferred on to a Sliding Panel System our digital printing service could be the solution for you, we can take any image you own or have bought and print it onto a blind. All images should be a minimum of 300dpi (dots per inch) or larger. This should be emailed through as a JPEG file. Digital printing is charged for at group 4 for standard finish and group 5 for a blackout finish.

Customers Own Material Panel Blinds

We can take a variety of fabrics you send us and with our highly skilled laminating service, bond it to a high quality white or cream backing cloth. The backing gives the blind weight, body and room privacy. A blackout backing which is ideal for bedrooms is also available.

Good quality cotton, polyester or poly/cotton mixes are all suitable. Avoid velvets acetate based fabrics and heavily embroidered fabrics. Some silk and voile fabrics cannot be laminated

Blackout Laminate

Ideal for bedrooms, a soft blackout laminate is bonded to the fabric. Blackout laminate backing is available on all soft fabrics for an additional 20%.

Panel Blind Specification

Standard Make Up

- White headrail
- Wand operation
- Fabric fixed to head rail with Velcro
- Top Fix

Options Available

- Silver headrail
- Cord operation
- Motorised operation with remote control systems.
- Face fix brackets
- Elite Panel Systems
- Panel clip operation
- Blackout laminated (restrictions apply)
- Non sewn option

Cord Operated Headrail

Non-sewn Option

Electrically Operated Headrail

Motorised Sliding Panel Blind System

The electrically operated sliding panel system is available with a 12v DC motor that is situated just behind the track on the left hand side. There are two options with this system via a transformer into the mains or via a battery pack that sits behind the head rail, hidden from view and which simply plugs into the head of the motor. This system comes with a single channel radio remote control. Please add £421 to the standard price of a sliding panel blind.

Elite Panel Systems

Elite panel blind is a unique free hanging panel blind system with a contemporary architectural look. The rail is provided with beautifully engineered brackets and hidden sliding profiles. The panels do not link together on this system like a conventional panel track but have magnetic panel clips that are attached to each panel for pulling back and forward. Please add the prices below onto the standard price of your panel system, for the panel clips please add £12.00 per panel.

When the blind is to fit the inside recess, a manufacturing reduction of 10mm will be made on the width of the blind.

terms & conditions

1. General

The headings in these conditions are for convenience only and shall not affect their interpretation.

2. Settlement

2.1 Payment for goods is due on the 20th of the month following invoice.

2.2 In the event of any payment becoming overdue (and without prejudice to any other right the Company may have) the Company shall be entitled to charge interest at the rate of (one and a half percent per month) (1.5%) over the HSBC base rate to run from the date for payment thereof until receipt by the Company of the full amount whether before or after judgement.

3. Cancelled orders

3.1 An Order may not be cancelled or varied after acceptance without the written consent of the Company. Such cancellation or variation shall be subject to such reasonable charges as may be appropriate.

3.2 For cancelled orders the Company shall be entitled to invoice the Customer for and the Customer shall pay a 40% handling charge on made to measure items dependant on the stage of manufacture. Fabric cut to order will be invoiced accordingly.

4. Retention of title

4.1 It is a condition of the contract that the property in all the goods to be delivered by the Company to the Customer shall remain vested in the Company until payment due under all contracts between the Company and Customer has been made in full.

4.2 Upon the fitting of the goods into any structure or sub structure at the premises or site of the Customer or its client the property and the goods both in law and in equity shall thereupon vest in the Company until payment due under all contracts between the Company and the Customer has made paid in full.

4.3 Until payment due under all contracts between the Customer and the Company has been made in full the Customer shall hold the goods on trust for the Company and shall be liable at the request of the Company at anytime to deliver up the goods to the Company.

4.4 Not withstanding that the property in all goods to be delivered to the Customer by the Company shall remain vested in the Company until the Company has received payment in full, the risk of damage to or loss of all or any such goods shall pass to the Customer forthwith upon delivery thereof to the Customer.

4.5 The Company reserves the right to repossess any goods supplied to the Customer which remain the Company's property hereunder and thereafter to resell the same and for this purpose the Customer hereby grants an irrevocable right to the Company through its servants and agents to enter upon all and any premises on which the goods may be. This right shall continue notwithstanding termination of the contract for any reason whatsoever.

4.6 Without prejudice to any other rights of the Company against the Customer the Company shall be entitled immediately to terminate each of any of its contracts with the Customer at any time upon the occurrence of any of the following events:

(i) If the Customer commits any act of bankruptcy or compounds or makes any arrangements with the Customer's creditors or executes a bill of sale on the Customer's goods or if any execution or distress is levied upon the goods of the Customer or;

(ii) If the Customer being a Company is wound up (whether compulsorily or voluntarily) or receiver of its assets is appointed or a wind-up petition is presented or any other step taken to wind up the Customer or place it in receivership or;

(iii) If the Customer makes default in any respect of any of its obligations under any of its Contracts with the Company.

Upon occurrence of any of the said events (notwithstanding anything to the contrary herein) all amounts in respect of any goods sold by the Company to the Customer shall become immediately due and payable.

5. Trade terms

The Company reserve the right to review prices, discount levels; discounts and terms at any time and therefore these are subject to alteration without notice. Orders are to be accepted at prices, discount levels and the terms ruling at the date of despatch.

6. VAT

VAT will be charged at the current rate.

7. Claims

Any claim for damages must be received by the Company - 'and any carrier engaged in the transport of the Goods' - in writing (other than on the carrier's delivery note) within 3 days of receipt of the Goods by the Customer. Claims for loss in transit must be submitted within 10 days of despatch of the Goods.

8. Product changes

The policy of the Company is one continuous improvement; the Company therefore reserves the right, without notice to change designs or specification cations of all our Goods described in this Price List, or temporarily withdraw Goods from it.

9. Dye batches & colour variations

It is our policy to try to achieve consistency when purchasing supplies of textile products. We are however subject to the limitations imposed by the textile industry and we cannot guarantee an exact match to sampling contained in collection books or on display at the premises of our Customers.

10. Home visits

It is not our responsibility to visit the installation of our products at consumer's homes. Our responsibility is to supply product of merchantable quantity as ordered. There should be no assumption that we will manufacture replacement products when the original product can be rectified when returned. We similarly have no liability for compensation to Consumers or Customers because of any delay in satisfying the original order.

11. Force majeure

The Company shall be under no liability to the Customer in any way whatsoever for destruction, damage, delay or any other matters of any nature whatsoever arising out of war, rebellion, civil commotion, strikes, lock outs and industrial disputes, fire, explosion, earthquake, act of God, flood, drought or bad weather, the unavailability or late delivery of supplies, inability to secure labour, or requisitioning or other act or order by any Government department, Council or other duly constituted body.

12. English law

Any contract formed between by acceptance of the Customer's order shall be construed and governed in all respects according to English law.

13. Years guarantee

The guarantee set out below applies to equipment of our manufacture. We undertake to repair or replace, free of charge any such piece of equipment or part thereof used under normal conditions for which the unit was designed, which is found to be faulty in either materials or workmanship within 12 months from the date of despatch from our works, fair wear and tear, misuse or damage due to the defective installation by Customers excepted. Responsibility is limited to the repair or replacement of the unit or part thereof and in no case are we liable for consequential loss or damage. This guarantee is in addition to any statutory rights which are not affected. Our responsibility under that clause shall cease if:

a) The Customer has not paid in full all invoices for goods supplied by us within the time stipulated on these conditions.

b) Our representatives are denied full and free right of access to the goods.

c) The Customer permits persons other than our employees or agents or those approved or authorised by us to effect any

replacements or parts maintenance adjustments or repairs to the goods.

d) The Customer has not properly maintained the goods.

e) The Customer uses any spare parts or replacements not manufactured by or on behalf of us and supplied by us.

14. Installation

14.1 If your Order includes Installation we have to make certain assumptions when we quote you a Price. These are that:

14.1.1 access to immediately outside your property is unobstructed to a small van with free parking available;

14.1.2 the area around where the Goods are to be fitted is unobstructed and of standard construction with no cables or pipes under the surface in the relevant area;

14.1.3 the walls or wood into which we need to attach hanging apparatus are in a condition that allows us to easily obtain good fixings for the tracks, poles and battens;

14.1.4 you have removed all ornaments, appliances and other objects in the immediate working area; and

14.1.5 none of the areas or items into which we are installing the Goods have any warranties or guarantees that will be invalidated by the Installation.

14.2 If these assumptions are not met in your circumstances, or if you have reason to doubt that they are, (for example if you live in a very old property, there are hidden pipes conduits or cables or if you have parking or access problems), you must let us know at the point of Order. If you do not we may need to make an additional charge if additional time, costs or materials are required to complete the Installation for you as a result of these assumptions not being met which will be added to the Price, and any warranties you may have on third party products may be invalidated.

14.3 For the avoidance of doubt we will not be responsible for carrying out any building work, for moving any furniture to clear access to the immediate working area, or for the invalidation of any warranties you did not tell us about in writing.

Safety Devices

14.4 We have to comply with the General Product Safety Regulations 2005. The Regulations have been introduced to help to prevent accidental death by way of strangulation to young children caused by them becoming entangled in blind cords. We take our obligations under the Regulations extremely seriously. These provide that safety devices supplied with Goods must be fitted by us at the time of Installation otherwise we may be negligent and perhaps be in breach of the Regulations. Therefore, if the Goods contain any safety device, we will fit this device and ensure that we have complied with the Regulations. In the event that you should instruct us that you do not wish to have such a safety device fitted, then we will refuse to install the Goods. In such an instance, you will be liable to pay us the Price under the Contract.

14.5 You agree that you will not treat our refusal to install the Goods for the reasons set out in clause 14.4 above as a fundamental or any breach of the Contract and that you will still be bound under the Contract to take delivery of the Goods.

14.6 For the avoidance of doubt we consider clauses 14.4 and 14.5 to be reasonable in all the circumstances given our obligations under the Regulations. This will not affect your legal rights as a consumer in relation to any Goods that are faulty or not as described.

15 This clause is extremely important and your attention is specifically drawn to the same: If the Contract includes Installation, you may not cancel or terminate the Contract if, for any reason, you should decide that you will not allow us to install any safety device that accompanies the Goods which means that, as a result, we cannot install the Goods at all (as detailed in clause 5.4 below). In such circumstances, you will still be liable to pay us the full Price due under the Contract (but this will not affect your legal rights as a consumer in relation to any Goods that are faulty or not as described).
