It is essential with electrically operated curtain tracks to choose a system which can readily cope with the specific demands placed on it. The most crucial factor is the total weight of the curtains transported by it, but then come further questions such as how the curtains are stacked, are there bends involved, ceiling or wall fix, the type of curtain heading etc.

## System Options

### 5100B - Base

This base system offers operation via a fixed, single channel wall switch. This switch is radio control, no pre-wiring required.
